-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. This is the First Office Action on the Merits from the examiner in charge of this application.

#### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Drawings***

3. The drawings were received on 8/23/2004. These drawings are acceptable.

#### ***Specification***

4. The abstract of the disclosure is objected to because it includes legal phraseology, such as invention. Further applicant is reminded of the length of the Abstract. Correction is required. See MPEP § 608.01(b).
5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

#### ***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3637

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1, line 3, "opening/closing" should be "opening and closing".

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001-336872 to Oishi.

JP 2001-336872 to Oishi discloses a refrigerator comprising all the elements recited in the above listed claims including, such as shown in Figs 4, 6, & 8, a door, a door handle assembly comprising door handle formed with a bracket accommodating portion and a first coupling portion adjacent bracket accommodating portion (shown in Fig 4a); a supporting bracket (shown in Fig 4c) installed in the front of the door to be accommodated in the bracket accommodating portion and having a second coupling portion locked to the first coupling portion by sliding the door handle, wherein the supporting bracket is formed with supporters at opposite ends thereof, and the door handle formed with a sliding guide supporting the supporters while sliding, wherein the first coupling portion and the second coupling portion are hook-locked to each other,

Art Unit: 3637

wherein the door handle comprises a front cover 9; and a rear cover 5 detachably coupled with the front cover and formed with the bracket accommodating portion, first coupling portion and the sliding guide, wherein a reinforcing cover 6 detachably connected onto the rear cover, wherein the reinforcing cover 6 is formed with a position corresponding to the first coupling portion of the rear cover.

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gose et al, Pohl et al, Christensen et al, Worrell, Shanok, Donaghy, Goetz et al, Myeres et al, Revlett, Carter et al, and Roberts et al all show structures similar to various elements of applicant's disclosure.
